## SUMMARY

As a front-end developer, I am skilled at collaborating efficiently with senior developers while taking the time to receive mentorship. I would say that I'm self-aware and know what will make me happy in the long run. I am prepared to utilize my passion for coding with a talented engineering team to create quality solutions.

When I am not working, I usually spend my time watching movies and TV shows.

## PROJECTS

### Dashboard

🌐 <https://panell.netlify.app/>

- I used Material Ui in this project to make it easy to build high-quality user interfaces.
- It has five different types of charts using Chart.js, Calender, Editor etc.

### Agency Landing Page

🌐 <https://skinfotechies.netlify.app/>

- It is build on top of the React JS, with Module css and smooth animations
- Through this project, I gained knowledge on website structure and advanced CSS.

### Weather App

🌐 <https://weatherzen.netlify.app/>

- Users will have access to real-time weather information, forecasts, and other weather-related data through this weather application

### Personal Portfolio

🌐 <https://kaushikrajput.netlify.app/>

I have a few pieces of my work that you can see here as well.

- I use this website to showcase my work as my personal portfolio
- It is built on Next.js, and for the style, I used SASS
